Trans. of Zeitschrift für Wissenschaftliche
Mikroskopie und Mikroskopische Technik (West
Germany) 1955] v. 62, no. 3, p. 147-151.

A newly developed expansion stretching device based
on operating conditions of electron microscopes per-
mits the observation of stretching in the course of
electron microscope investigations. Construction and
operating procedure of this apparatus are described
and possibilities for its application are discussed in
relation to the high preparative demands and to the
effects of electron radiation. (Author)
